

Value Based Care Coalition Members' and Partners' Commitment to Improve COVID-19 Vaccination

August 4, 2021

The COVID-19 pandemic tested the strength and resilience of the U.S. health care system. Through the crisis, value based care providers have delivered coordinated, integrated care for their patients, leveraging years of work to develop and invest in population health infrastructure.

While our COVID-19 vaccination efforts have made great strides, our Coalition Members and Partners are committed to continuing the work of increasing vaccination rates and guarding against the spread of COVID-19. Consistent with that goal, our Members and Partners commit to the following three actions:

Value based care participants exhibit strength in deploying robust care teams to deliver care within local communities. By joining and continuing efforts to lead outreach, support education, and improve access within their own networks, these organizations' reach and impact are vast. These care teams have been on the frontlines providing high-quality care throughout the COVID-19 pandemic, and they will continue to play a critical role to reach optimal vaccination levels nationally.

The following Value Based Care Coalition Members and Partners, representing 29 organizations and reaching more than 1,000,000 patients, commit to these outlined actions:

Accountable Care Coalition of Georgia, LLC
Accountable Care Coalition of Northeast Georgia, LLC
Accountable Care Coalition of Northeast Partners, LLC
